

Stop typing orders. Start filling them.

Forward any customer order to Plantiful — email, PDF, spreadsheet, image, Word doc, fax, text message, even a handwritten note. AI reads it, matches every line to your customers and catalog, and builds a draft sales order in seconds. Your team reviews and approves.

HOW IT WORKS

STEP 1

Forward the order

A customer order comes in, in any format. Forward it to your Plantiful intake address.

STEP 2

AI extracts & matches

AI reads every attachment, pulls the line items, and matches them to your customers and catalog.

STEP 3

Review the draft

A draft sales order appears in Plantiful. Review, confirm, and go.

WHAT THE AI DOES

CUSTOMER WROTE

CUSTOMER	"Sunny Acres"
FULFILLMENT	"I'll pick up next Tuesday"
ITEM 1	"Knockout Rose — Red, 3 gal"
ITEM 2	"coral carpet rose, 2 gal"
ITEM 3	"Blue Spruce, 7 gal"

✓ PLANTIFUL MATCHED

Sunny Acres Garden Center	Matched
Pick up · August 18, 2026	Matched
Rosa 'Radrazz' Knockout #3	Matched
Coral Drift #2 · verify variety	Review
No match found	Missing

BENEFITS

Reduce data entry

Forward the email and move on. The draft order builds itself.

Fewer errors

AI reads exactly what the customer wrote — no typos or transposed digits.

Free up your team

Staff focus on customers, not copying line items out of PDFs.

Any format

PDFs, spreadsheets, images, Word docs, plain-text email, and more.

BUILT FOR TRUST

- ✓ **Green / yellow / red on every match**
See at a glance what matched cleanly, what needs review, and what's missing from your catalog.
- ✓ **Human review before anything ships**
Orders stay in draft until your team approves. Nothing leaves the warehouse unchecked.
- ✓ **One-click corrections & auto-allocation**
Override a wrong match instantly. Confirmed orders auto-assign inventory into fulfillment.

"I never thought we'd be using AI here at the nursery — but being able to forward an email and have it create an order is pretty great."

Joanna D'Ancona · Office Manager, Sampson Nursery

READS EVERY FORMAT

Nurseries have paused hiring a data-entry role.

The tool does the job they were about to hire for — so the team they have can do more.
